Affidavit of John R. Fouts – War Crimes, Torture, and Civil Rights Destruction under Color of Law

I, the undersigned, under penalty of perjury, do hereby declare that the statements contained in this document are true and correct to the best of my knowledge, belief, and lived experience. This affidavit outlines years of deliberate, state-enabled harm that I and my special needs disabled child have endured at the hands of public institutions, licensed professionals, and federally funded systems, including—but not limited to—medical providers, housing authorities, judicial officers, and welfare agencies.

I reserve all rights to revise and amend this affidavit as additional information, harm, or evidence emerges. I also assert my right under the **Americans with Disabilities Act (ADA)** to have all responses to this affidavit, and any related proceedings or communications, provided to me **in writing**, in plain language, and with reasonable accommodation for my disabilities.

Furthermore, I assert my right to **immediate access to medically necessary stimulant medications at therapeutic levels**, without delay, obstruction, or gatekeeping by biased or retaliatory medical professionals. These medications are essential to preserve not just quality of life—but life itself. Continued denial constitutes deliberate endangerment and medical abuse.

Injury and Harm Summary – Civil Rights, Medical, and Humanitarian Violations

I have sustained life-altering, irreversible harm due to willful neglect, abuse, abandonment, endangerment, state-sponsored discrimination and retaliation, and targeted institutional abuse against me and my special needs disabled child.

This includes physical, psychological, and legal injury, meeting the legal thresholds for:

- Intentional Infliction of Emotional Distress (IIED)
- Negligent Infliction of Emotional Distress (NIED)
- Color of Law Abuse (18 U.S.C. § 242)
- Torture under U.S. and International Law (18 U.S.C. § 2340)
- War crimes and persecution under universal human rights frameworks

1. Irreversible Physical Injury

- Progressive neurological impairment from under-treated neurological disease with known outcome regarding not treating fully - including 2 discovered spinal tumors (new) in the last 2 years that remain inappropriately unaddressed despite asking multiple physicians to get second opinions or over-reads.

- Permanent nerve damage due refusal of multiple physicians over years to adequately treat or try to find cause or source of issues. Also, this is in part due to failure of copper infusion treatment at current dose/rate and refusal to re-evaluate or modify care fully - I was told infusions could be moved from every 52 days to every 49 days.
- Ongoing microvascular and clotting damage due to Medicaid refusing to pay for the only provider in the U.S. treating Long COVID with triple anticoagulation therapy and refusals to reimburse for medically necessary care, procedures, compounded medications, and therapies, even rx that are on the formulary directly or listed explicitly.
- Organ dysfunction and deterioration from untreated or disregard for macrocytic anemia, nutrient malabsorption, and gastroparesis—all ignored by Medicaid, Medicare, and state-licensed physicians and facilities.
- Severe malnutrition and related complications due to wrongful SNAP termination and systemic refusal to consider any medical expenses despite federal law requiring that consideration. No due process.

These injuries were not accidents. They were foreseeable, preventable, and intentionally ignored.

2. Psychological and Emotional Torture

- Complete loss of dignity. I've been medically humiliated, legally dismissed unlawfully at levels by judiciary Article III judges and officials at the level of TREASON against the US Constitution, and systematically stripped of my rights and autonomy.
- C-PTSD compounded by medical gaslighting, legal obstruction, and bureaucratic intentional cruelty which remains ongoing.
- Mental health collapse, not from psychiatric illness, but from the sustained emotional violence of being told, again and again, “You don’t matter - your life does not matter - neither does your child's.” I refuse to accept that from anyone. These are implied statements from lived experiences with the receipts to back them up.
- Suicidal ideation directly caused by ongoing deliberate malicious state actions or inactions. Despair from illness to a degree—but COMPLETE despair from knowing that EVERY SAFETY NET IS WEAPONIZED AGAINST ME LEAVING NO ROOM FOR ANY KIND OF HOPE FOR ANY FUTURE.

3. Socioeconomic Destruction

- Unlawful illegal forced homelessness and economic ruin including bankruptcy and forced to utilize one time lump sum of disability payment for medically necessary expenses to stay alive while Medicaid and KY denied care yet collected funds from the federal government, and despite qualifying for ADA housing protections and holding a Mainstream Housing Voucher and being on the Home and Community Based Services voucher HCBS 1915c, and 504, and VAWA.

- Loss and property, theft, linked to housing obstruction, and ongoing discrimination and retaliation.
- Inability to work or function due to long-term untreated or intentionally under-treated illness and state-sanctioned deprivation and persecution without cause.
- Lost years of legal effort, academic effort, quality time with child, independent time as a human-being, freedom, liberty, pursuit of happiness—federal complaints, filings, and court actions sabotaged by refusal to serve, obstructed by courts, and ignored by agencies -- judicial actions rising to the level of Treason against the US Constitution - unchecked.

==========

This isn't just economic harm. It's civil and constitutional annihilation.

==========

4. Legal Classification: War Crimes, Persecution, and Torture

Under both U.S. federal law and international human rights doctrine, what I have endured qualifies as:

- Torture (per 18 U.S.C. § 2340) — "the intentional infliction of severe physical or mental pain or suffering by or at the instigation of or with the consent or acquiescence of a public official."
- Persecution — systemic denial of basic rights based on protected status (disability, whistleblower, civil rights complainant).
- State-enabled slow execution — denial of food, medical care, legal access, and basic protection in the face of documented threats, chronic illness, and dependent care responsibilities.

==========

Closing Statement

"I do not consent to death. I do not consent to disappearance. I do not consent to slow, silent execution through denial of care or inadequate care when known higher quality of life and solutions exist for health related issues.

The state has done everything in its power to erase me—physically, psychologically, socially, and legally—and **I am standing here anyway**, **as living proof of institutional war crimes against a U.S. citizen and a disabled child.**"

5. Relief Sought and Demands for Accountability

- **Immediate federal investigation** into systemic civil rights violations by LMHA, Medicaid administrators, SNAP program officials, healthcare providers, and state and federal judicial actors.
- **Emergency protective remedy and relocation assistance** for myself and my child, JAF, to ensure immediate access to housing, nutrition, and medically necessary treatment.
- **Restoration of benefits** wrongfully denied or terminated, with back pay and corrective action.
- **Safe, permanent housing that we own**, chosen by us and located in a region of our preference, guaranteed by the federal government, fully accessible and adapted to our medical needs. The government shall have no authority to place, relocate, or interfere with our choice of residence, and shall bear all acquisition, ownership, and maintenance costs in perpetuity.
- **Safe, private transportation that we own**, funded and maintained by the federal government for life, to ensure consistent access to care and mobility.
- **Lifetime care provisions**, fully funded and managed by independent, non-state parties, to prevent any further exposure to corrupt agencies or state-sanctioned medical negligence.
- **Lifetime discretionary income**, no less than $7,500 per month (adjusted annually for inflation), guaranteed tax-free for life. This income is to support full autonomy, self-determined quality of life, and the right to rest, rebuild, and heal without surveillance, recertification, conditionality, or threat of reduction by any government actor or agency.
- **Full healthcare coverage for life**, including access to integrative, experimental, out-of-state, or international treatments, without delay, limitation, or prior authorization barriers. All out-of-pocket costs must be paid by the federal government through a neutral third-party trust. This includes unrestricted access to stimulant medications, even if above standardized dosing norms, for the duration of my life. The right to access these medications shall be recognized as essential to both my survival and my functional quality of life, and shall not be impeded by policy limitations, physician bias, or bureaucratic obstruction.
- **Ongoing disability payments** must continue in full, with no interruption or reevaluation, as a permanent acknowledgment of harm and ongoing needs.
- **Lifetime access to all essential nutrition and food needs**, fully covered, with unrestricted access to medically appropriate and therapeutic foods based on evolving health conditions, with all costs borne by the federal government.
- **Irrevocable legacy trust**, established for both myself and my child, JAF, funded entirely at the government's expense, to ensure the secure, non-cancellable delivery of all restitution, property, medical access, and financial provisions across our lifetimes. This trust shall be permitted to operate and hold assets in international and offshore accounts to protect against any future governmental overreach, seizure, or collapse. The trust must be managed by independent

fiduciaries with no ties to any government entity, and must contain provisions for full continuity of care and access in the event of U.S. government destabilization or dissolution. In the event that I am incapacitated or unable to act as primary authority, fiduciary control and decision-making shall automatically transfer to a designated successor or guardianship party of my choosing, pre-established within the trust structure, to preserve continuity and full access for my child, JAF, without any lapse or outside interference.

- **Independent third-party trust or fiduciary oversight** of all benefits, remedies, and provisions granted, ensuring no bad actors—whether state, federal, or private—may later revoke, alter, or weaponize them against us.
- **Permanent detachment from all government systems post-compensation**, including legal recognition that once stable housing, transportation, nutrition, income, and care are provided, the federal and state governments must withdraw from our lives entirely. This includes full immunity from future interference, audits, surveillance, or conditionality. Any needs arising thereafter are to be met in perpetuity by non-state actors or trusts set up at government expense.
- **All provisions extended fully to my child, JAF, for life**, with no reduction in scope, value, or access. This includes housing, healthcare, income, food, legal protection, medical autonomy, and psychological support, guaranteed at or above the standard provided to me. Their right to heal, grow, and live safely and independently must be safeguarded perpetually, beyond my lifetime, including the ability to make future medical decisions with full autonomy and without state interference or coercion.
- **Future advocacy immunity**, guaranteed for both myself and JAF, protecting us from any future targeting, retaliation, legal action, surveillance, defamation, or deprivation of rights as a result of whistleblowing, public testimony, human rights advocacy, or legal action taken to expose these abuses.
- **Patient-directed care authority** must be enshrined as a permanent, enforceable right. I, and my child JAF, retain the sole authority to determine what treatments are appropriate, necessary, and aligned with our survival and quality of life. No provider, agency, or policy may override this autonomy. All care decisions must follow the principle of informed consent and respect for lived experience as medically valid.
- **Formation of Sovereign Fellowship**: Upon fulfillment of the relief sought, I retain the right to form or join a non-state, faith-based sovereignty structure (including but not limited to a 508(c)(1)(a) organization) to govern all future affairs, protect our autonomy, and maintain our independence. This structure shall be legally recognized as immune from state control, surveillance, or regulation, and shall serve as the governing and spiritual body for the legacy trust.
- **Permanent legal immunity and protection** must be granted to myself and my child, JAF, for any past or future legal actions arising from whistleblowing, forced survival decisions, or resistance to state abuse. No court, agency, or jurisdiction shall have the authority to

retroactively prosecute, surveil, or penalize us for any actions tied to our survival or truth-telling under duress.

These demands are not simply about reparation—they are about **restoration of humanity**, **affirmation of truth**, and **institutional reckoning**. Anything less would be complicity. Justice delayed is survival denied.

Signed and declared under penalty of perjury, pursuant to 28 U.S.C. § 1746:
